Cookies policy

Cookies are small files that are stored in the device's permanent memory when you visit certain websites. They contain information about your device and do not contain information about your identity. These files cannot be used to infect your device with viruses or other malware.

Cookies store basic, anonymous information about users (e.g. an identifier assigned by our Website) which we use to analyse and improve our website experience (e.g. for content optimisation).

There are two types of cookies that we use on the website:

Necessary cookies - necessary for the proper functioning of the website. You can deactivate them only by changing the settings in your browser, but this may affect the proper functioning of the website.

Analytical cookies - used to analyse user behaviour on the website. Thanks to them we can analyse interest of visitors and adjust content or website functionality to meet users needs.

You may at any time stop providing this information by deleting cookies stored on your computer or mobile device. To do so, you must change the settings of your browser.
